

EXTRATHIN,
a perfect fit between
game machines.
The change machine
to complete the range.

CHANGE MACHINE

jolly

- Smaller than the span of your hand.
- Due to its appearance and colour, it fits in perfectly in the game room environment.
- It looks good anywhere, just like a jolly. It can be put between two game machines, or alone, to ensure an efficient money changing system.
- Its particular mechanical details and its ingenious design, certainly, make jolly a winning change machine.
- The technical space, with electronic and payments systems, is completely isolated from the cashbox.
- Security performance is impeccable; both cashbox and electronic components are perfectly protected by an excellent locking system.
- The cashbox and the hopper have transporting handles, which facilitate extraction to avoid theft or burglary attempts so when the room is closed the empty change machine can be left on view.
- Despite its reduced size it offers an excellent coins capacity (4500 coins).
- Money collection is made easy due to the special space for removal collection cups.
- On request, Jolly is available with integrated cup distributor.

CUP SIZE MAX	h 120 mm - Ø 145 mm

COINS CAPACITY

	0,50 €	1,00 €	2,00 €
1 MK4 WITH MONO-BLOCK EXTENSION	4,500	4,500	3,500

DESIGN AND ERGONOMICS

- The technician's room is separate from the cash-box. So the payment systems are therefore completely protected (Fig. 3).
- For maximum protection of the takings the hopper is loaded externally. The opening flap on the top of the machine comes with a specific camouflaged lock, maintaining the styling of the change machine.
- The hopper and extension can be easily extracted in a single block using their transporting handles.
- The coin/banknote cashbox also have handles for easy transportation.
- The collection of large quantities of coins or tokens is made easy by using the special space for distribution with or without collection cups (Fig. 2).
- Cup distribution can be carried out using special distribution tubes, which are optional.
- The display and instruction plaque are easy to read (Fig. 1). The plaques can be personalised.
- Jolly is equipped with a button showing when the cashbox door is open and can be fitted with alarm systems.
- The change machine's special construction protects it from spilt liquids on the upper level.
- Stability is guaranteed by the ballast which can be found in the base.

INSTALLED PERIPHERALS

- RM5 Evolution electronic coin mechanism
- NV10 banknote reader
- LCD Display (included)
- Electronic board with cash audit data available (included)
