

AN ADVANCED CASHLESS  
PAYMENT SYSTEM that  
enables self-service  
high pressure roller  
washing systems and  
additional services.

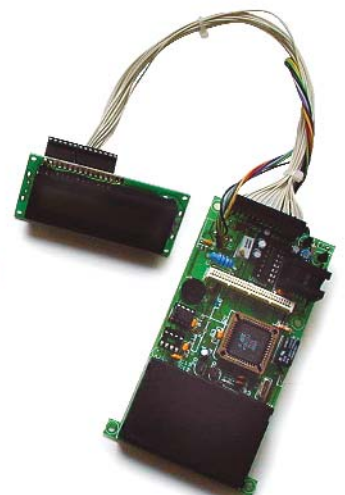

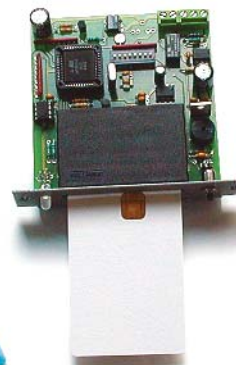

# MICROCHIP CARD SIMPLYCARD

- It avoids the circulation of money on site.
- It is easy to install on any apparatus and in any situation.
- Distribution to customer is made easy by a specific card distributor.
- Possibility to change coins and/or tokens for auxiliary services.
- It is easy to recharge with coins, banknotes or a special "POS" manual system used by the manager.
- When it is installed in a Autocoin change machine it can be dispensed, recharged or used to buy tokens.

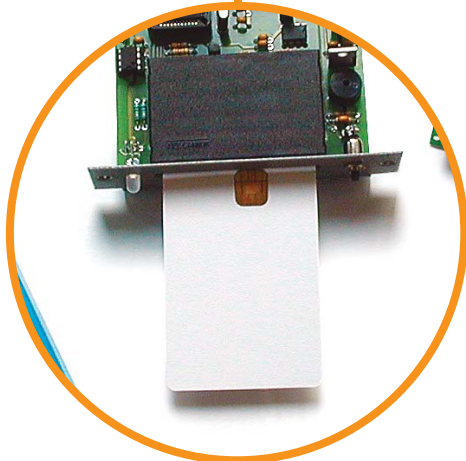

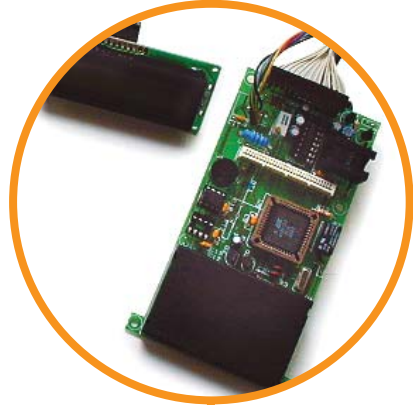

## USE

- Self-frames*
- High pressure tracks*
- Vacuum cleaners*
- Mat washing*
- Product distribution*
- All additional services in general*

...

# MICROCHIP CARD SIMPLYCARD

## TECHNICAL FEATURES

MEMORY CHIP CARD	SLE 4428 SIEMENS	AS AN ALTERNATIVE SL4416 OR GPM416
POWER SUPPLY	12V 50-70 mA	

## INSTALLATION

Rear installation by means of a special fixing-bracket.

On the front panel only the opening for cards and data signalling led can be seen.

## AUDIT

Rear installation by means of a special fixing-bracket.

## PRODUCTS AVAILABLE

- SimplyCard Wash 1
- SimplyCard Wash 2
- SimplyCard Programmer.

## SIMPLYCARD WASH 1

- It gives the possibility of using the card as coin validator activating any wash or auxiliary service in the same way.
- 12V 50-70 mA power supply with "ready" entry for the management of plants out of order.
- By means of a frontal mounted pushbutton it is possible, at each impulse, to download an amount programmed by the chip-card giving an impulse at exit.
- Single impulse operation or timed impulse.
- Three colour signalling led to show card availability.

## SIMPLYCARD WASH 2

- In comparison with Card Wash 1 this chip-card has been mainly developed for use on high pressure manual tracks.

- It comes with a LCD rear-lighted display to show the customer clearly the actual amount on the card and all necessary information.

- Power supply 24 Vdc or 16-24 Vac.

- It operates with a pushbutton with fixed download or without key with automatic download each time the card is inserted, single or timed impulse.

- Direct interfacing with:

- NV5 banknote reader
- RM5 electronic coin mechanism
- RS 232 interface
- 12 key telephone type keyboard

## SIMPLYCARD PROGRAMMER

- A portable machine that gives the possibility to format the loading and downloading of credit and points from the chip-card.
- The apparatus is like a battery-fed POS with a 16 key keyboard and LCD display.
- It can also be used for the sale of services or products at different prices on site; in addition, the total of transaction made can be visualised and downloaded for auditing and eventual vision on PC, on a special manager's card.
