

DESIGNED TO
INCREASE
profitability
on all types
of machines.

BANKNOTE READER SMILEY NV5

- Designed to accept all Euro notes and multiple currencies.
- Advanced optical reading system with top and bottom note scanning.
- Very high acceptance and excellent security.
- It accepts up to 16 different notes.
- Simple to use and easy to mount and reprogramming.
- Exclusive "cloning" system.

USE

Gaming in general
Automatic distribution
Car washes
Service stations
Arcades
Playgrounds
Car parks
Gyms
...

BANKNOTE READER

SMILEY NV5

TECHNICAL FEATURES

SIZE (mm)	HEIGHT:	84
	WIDTH:	96.6
	DEPTH:	93
SIZE OF FRONTAL (mm)		90 x 84
SIZE OF COMPACT FRONTAL (mm)		110 x 50
POWER SUPPLY		12 VDC
CONSUMPTION		12 V DIRECT CURRENT - 350 mA AT REST - 1A IN ACCEPTANCE
ABSORPTION		MAX: 1000 mA
SPEED OF ACCEPTANCE		STD 4 SEC.
TEMPERATURE RANGE		3 ÷ 50 C° WITHOUT CONDENSATION

KEY BENEFITS

- Designed to accept all Euro notes and multiple currencies.
- Very high acceptance and excellent security.
- Flat note exit for easy stacking / note handling options.
- Horizontal and vertical stacking options.
- User selectable security levels - each note can have a different level.
- Currency database available for many countries.
- Interface connections for various loading systems with key or card are available, as well as easy mounting and banknote connection.
- Currency programming via PC or using the "EUROCLONING" system.
- Electronic or and mechanical anti-fishing.

BANKNOTE READING

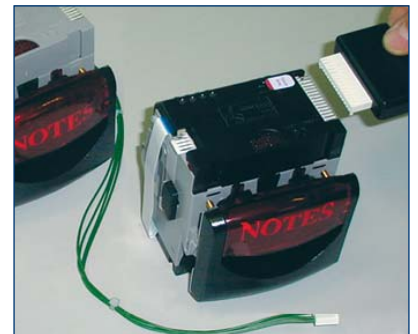

- A high level of distinction is guaranteed by a complete reading of the whole note, both on the front and the back at the same time.
- Banknote recognition signals can be redirected and chosen to 15 reader exits plus 1 false notes.

CONFIGURATIONS

It can be conformed in the following versions: parallel, serial, RS232 serial, binary, pulse. The type of exit can be programmed on site.

PROGRAMMING

- Programmable through PC.
- Programming can be done using the exclusive "EUROCLONING" system (reader to reader reprogramming).
- A Master reader is used for the "Eurocloning" system to download chosen files in its own installed reader (SLAVE); the speed of updating the range of machines is guaranteed by this modern system.

- The file for firmware updating and banknote programming (for over 70 countries) is available free of charge on internet.
