

## Coin counters/sorters

82

# 401 / 501 - 410 / 510

Ideal to count and sort up to 4/5 different types of coins also directly at collection sites.

Compact and transportable coin selectors, user-friendly thanks to the interactive graphic display.

They can be equipped with a rechargeable battery ensuring a two-hour operating autonomy.

The 401 model is ideal to count and sort up to four different types of coins: for euro currency the machine is provided with four output tubes to sort and count 0,50 - 1,00 - 2,00 coins.

Different coins are sorted in a common output but counted separately by size.

The 501 version counts and sorts all coins from 0,10 to 2,00 euro.

Every output can be programmed to stop at programmed quantities to form coin bags or tubes.

## General characteristics

The 401 coin counter/sorter is ideal to count up to four different types of coins at collection sites.

The 501 version counts and divides up to five different types of coins.

The interactive graphic display shows all sorting/counting parameters.

Using the specific function it is possible to count also banknotes and to add them to the coin counting.

Thanks to the permanent memory, even if the machine is off, all data regarding the counts made remain available.

They can be set to stop at programmed quantities to form coin bags or tubes, managing up to 40 different users simultaneously and to get the total accounting.

The 410/510 models are available with additional loading devices ideal to sort and count large quantities of coins in heavy duty conditions of the machines.

Thanks to the RS 232 interface and printer, both optional, it is possible to transfer to pc the accounting data so to process them with specific management programs and to get a final report of the operations made or to print them at the end of operation.

## Options

- on-board printer;
- RS 232 serial interface;
- device for coin insertion in tubular containers (Fig. 1);
- single collection container with or without metal connection (Fig. 2);
- extension tray (Fig. 3);
- rechargeable battery version;
- transport case (Fig. 4);
- machine support (Fig. 5).
