

Wash Point

State of the art technology, a champion of quality and design

The first centralised cash point to offer the security, functional efficiency, ease of use and flexible management required by today's self-service laundrettes. The unit is designed for medium and large facilities and can manage a variable number of washing machines and dryers. It is equipped with many tools for standardising the management of various laundrettes, for setting targeted pricing policies and for implementing customer loyalty campaigns.

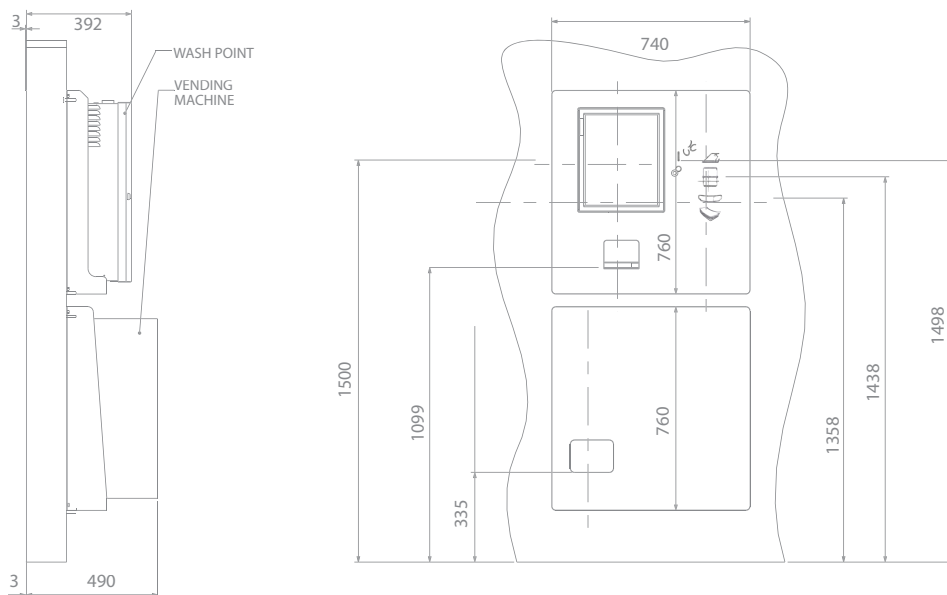

Wash Point offers great payment flexibility, accepting both cash and cards, thanks to its various peripherals. What's more, the dispensers automatically recharge themselves with the money inserted for paying the services and recharging the cards, thereby increasing the system's autonomy. The graphics of the panel and the cards can be customised in order to allow increased visibility of the company logo.

Features

- Opening with 4-point closing lock, anti-theft device available upon request, separate coin compartment protected by a second lock, wide 17" touch screen colour display with anti-vandalism protection device.
- Installation: recessed, within the laundrette's technical cabin; wall mounted; free standing on cabinet unit.
- The simple and functional browser, allows easily carrying out various operations directly on the cash point:
 - cash point configuration;
 - accounting data analysis;
 - tests for the installed peripherals and for any machines connected to the cash point, in order to identify any malfunctions and to verify its correct configuration;
 - preparation of the cards intended for sale and those with privileges for the machine administrators, franchisees or maintenance technicians;
 - Importing of configuration data in order to quickly clone the configuration of another cash point;
 - Exporting of the configuration and accounting data for analysis on external systems.
- Access to the various functions according to the type of card being used: for technicians, for managers/franchisees, for sub-managers/franchisees.
- Optional laundry product dispenser, which can dispense up to 9 types of items, for a total of 162 products.
